## About Me

Full Stack Web Developer with a background in Film & Media Production and a life-long dedication to learning. Effective at combining creativity and problem solving to develop user-friendly applications. Known amongst peers for strong wit and attention to detail no matter the complexity of the project.

## Projects & Experience

*Reci-Pro! - 2022*
GitHub | https://github.com/TR742/ReciPro-sitory
Key responsibilities:
- A very successful group project during my time at UofA.
- We came up with a recipe sharing site with a twist on utilizing more user interconnectivity.
- Outside conception, my main duties included creating and maintaining the functionality of the back-end models/seeders.
- HTML, CSS, JavaScript, Node, Express, SQL

*DreamTeamLayout - 2022*
GitHub | https://github.com/phlipadelphia/DreamTeamLayout
Key responsibilities:
- My task was to build a Node.js command-line application that takes in information about employees on a software engineering team, then generates an HTML webpage that displays summaries for each person.
- HTML, CSS, JavaScript, Node, Inquirer

*Ken's All Star Movers - 2022*
GitHub | https://github.com/BrantMartin/KensAllStarMovers
Key responsibilities:
- The final project of school, wrapping up and showcasing everything we had learned.
- We came up with a hypothetical client and set out to create a would-be company website.
- Outside conception, my main duties included creating and maintaining the functionality of the models, seeders and utils for both front and back end.
- HTML, CSS, JavaScript, full MERN stack
