About Me

Full Stack Web Developer with a background in Film & Media Production and a life-long dedication to learning. Effective at combining creativity and problem solving to develop user-friendly applications. Known amongst peers for strong wit and attention to detail no matter the complexity of the project.

Projects & Experience

Reci-Pro! - 2022
GitHub | https://github.com/TR742/ReciPro-sitory
Key responsibilities:
- A very successful group project during my time at UofA.
- We came up with a recipe sharing site with a twist on utilizing more user interconnectivity.
- My main duties included creating and maintaining the functionality of the back-end models & seeds.
- HTML, CSS, JavaScript, Node, Express, SQL

Travel I.O. - 2022
GitHub | https://alexarizona00.github.io/ProjectUno
Key responsibilities:
- Put together as a project among former classmates, made to test our skills, particularly with Web APIs.
- It's a travel application with a search-by-city feature that gathers data on any particular city including weather, lodging and nearby attractions.
- I helped with the web APIs and CSS for the landing page.
- HTML, CSS, JavaScript, Node, Inquirer, APIs.

Ken's All Star Movers - 2022
GitHub | https://github.com/BrantMartin/KensAllStarMovers
Key responsibilities:
- A project made with friends:
  - "From the team that brought you Reci-Pro!"
- We came up with a hypothetical client and set out to create a would-be website if we were hired by a moving company.
- Outside conception, my main duties included creating and maintaining the functionality of the models, seeders and utils for both front and back end.
- This is a full MERN stack application with HTML, CSS & JavaScript.
